The HAPPY KITCHEN

Do you cook by mathematics or by callsthenics? Callsthenics are fine in their place, but the place isn't in the kitchen. It's much easier to cook by a recipe of one part mathematics, two parts ingenuity, and a large-sized portion of fun and adventure.

There's really no need at all for back-breaking drudgery in this modern day and age. There are undiscovered worlds of new things to make, new ways to make the old dishes better, "hurry-up" time-savers and wife-savers, and hosts of short-cuts to meals more delicious than Epicurus ever dreamed. And they're all so easy and so simple—you don't have to spend the whole family budget or even a very big slice of it for them. You'll wonder, when you hear them, how in the world you've missed thinking of these joyous aids to happier meals before this.

If you want to hear about the latest fashions in foods, and the way to make them with less work and more fun, we have a treat in store for you — our FREE Cooking School. It has been arranged by practical experts on cookery — and it will be crammed full of suggestions to brighten your kitchen for a whole year. Every comfort has been provided, you'll get lots of entertaining surprises — and all you have to do is just Come!
